Daniil Polozov

Product Manager, Fintech

jokerdab@gmail.com · +7 915 810 84 08 · Daniil Polozov · jokerdabro

Product manager with 8 years in fintech, marketplaces, and AI, including startups from zero. I take products from idea to launch with small engineering teams, build automations and AI agents myself, and took a product to its first UK clients.

One platform to open financial products, every business line.

T-Bank · Origination platform

Products per customer

2.5

from 1.5

Cards	Reusable module
Investment accounts	Reusable module
SIM	Reusable module
Insurance	Reusable module

Checkout conversion in a top-2 marketplace app.

+3 pp

I build it myself in n8n, for over a year.

- AI agents and API integrations
- Structured JSON and validation
- Routing and human-in-the-loop

Support staff costs after ML routing and automation.

MVP in 4 months

EXPERIENCE

T-Bank · Fintech · 54M+ active customers

2022 — present

Three lines of business, 74 people in 8 teams.

Head of Product · Investments: advisory and education

30 people · 3 teams

Investment advice for Mass Market, Affluent, and HNWI clients, and investment education inside the investment app. Goal: grow segment revenue and turn learners into active investors.

- Used data on client trades and feedback to change the success metric for education from views to trades: **MAU 3.3× in a year**, client trading activity 2.4–3×, the business line reached break-even.
- Built ML recommendations and a multi-agent AI system for wealth managers: advisor time per client –30%, segment revenue +10–15%.

Product Lead · Origination platform

32 people · 4 teams

The platform every business line uses to open its products in one click: cards, investments, SIM, insurance. Goal: more products per customer and faster delivery for every business line.

- Replaced one-off opening flows for each financial product with reusable modules: **product usage after opening +10 pp** for non-financial and +3–4 pp for financial products.
- Moved 3 teams off legacy, retired redundant services, and coordinated 4+ teams: delivery 2.5× faster. Gave business lines a predictable release plan: stakeholder CSAT 6 → 8 out of 10.

Product Lead · AI support platform 12 people

Voice and text bots, ML pipelines, and process automation for customer support across the bank. Goal: automate more requests and answer faster at lower support cost.

- Streamlined how support operations work: one process from intent writers and the automation team to each business line, plus forecasting and routing: **first response 1.5 min → 15–20 s**.
- Merged 3–4 disconnected microservices into one platform: automated share of support +16 pp, delivery 1.5× faster.

GitJob · HR-tech startup · Senior Product Manager

2021 — 2022

B2B platform that finds developers by their GitHub profiles and code instead of résumés. Goal: launch from zero and close the first B2B deals. Cross-functional team of 6.

- Took the product from idea to launch: customer discovery with recruiters, the PRD, and the matching logic: **0 → 3M searchable candidates in 4 months**.
- Replaced the team mid-build, development time 4× shorter; ran sales myself through Telegram, paid ads, and a product demo.

iReg · Legal-tech startup · Senior Product Manager

2020 — 2022

Copyright protection in 100+ countries. Goal: grow the customer base and the average order value. Cross-functional team of 12.

- Adapted the product for new markets through partners Microsoft, EY, and Startupbootcamp: **first clients in the UK**, Poland, Brazil, and China.
- A/B-tested the offer and payment format, from one-off purchase to subscription and B2B: average order value 5×, customer base 2.5–3×.

Pandao (Mail.ru) · E-commerce · Product Manager

2018 — 2020

Top-2 marketplace for goods from China across the CIS, mobile app and web. Goal: grow the audience and checkout conversion. Cross-functional team of ~40.

- Read support cases every week, turned recurring complaints into fixes in the path to order, and A/B-tested ranking, cart, and checkout: +1.8 pp checkout conversion on mobile web, **average order value +60%**.
- Grew acquisition, ASO, and retention: MAU 2M → 4.7M.
