+10–15% Segment revenue

~3× MAU growth

–10–15% Support operating costs

2.5× Faster time-to-market

SUMMARY

Product leader with 8 years in fintech, AI, EdTech, and e-commerce. I set product strategy, rebuild platforms, and lead cross-functional teams of up to 74 people, from 0→1 launches to products with millions of users.

EXPERIENCE

T-Bank • Fintech

2022 — present

Digital bank with 54M+ active customers. I led three lines of business: 74 people in 8 teams.

Head of Product • Investments: advisory and education

Investment advice for Mass Market, Affluent, and HNWI clients, and investment education for any level. Goal: grow segment revenue and turn learners into active investors.

Cross-functional leadership of 30 people in 3 teams

- Built ML recommendations and a multi-agent AI system for wealth managers: 3–5K Premium clients use the advice weekly, manager time per client –30%, 2× more new clients, segment revenue +10–15%.
- Turned education into part of the investment journey, measured by trades rather than views: reach 1.5M → 5M, MAU 3.3× to 800K–1M, trading activity 2.4–3×. The business line reached break-even.
- Launched an investment trainer (730K+ users in 1.5 months) and a savings marathon that brought ~$43M into customer savings. finAward'26, best investment product of 2026.

Product Lead • Origination platform

The platform every business line uses to open its products in one click: cards, investments, SIM, insurance. Goal: more products per customer and faster delivery for every business line.

Cross-functional leadership of 32 people in 4 teams

- Replaced one-off opening flows with reusable modules: products per customer 1.5 → 2.5, product usage after opening +10 pp for non-financial and +3–4 pp for financial products.
- Moved 3 teams off the legacy stack and coordinated 4+ teams: delivery 2.5× faster.
- Gave business lines a predictable release plan and set quarterly goals by business value: internal CSAT 6 → 8 out of 10, team efficiency +20%.

Product Lead • AI support platform

Voice and text bots, ML pipelines, and process automation for customer support across the bank. Goal: automate more requests and answer faster at lower support cost.

Cross-functional leadership of 12 people

- Merged 3–4 disconnected microservices into one platform for every business line: delivery 1.5× faster, automated share of support +16 pp.
- Launched ML classification and routing, tested with A/B: requests the bot resolves on its own +15 pp, intent recognition +8 pp, first response 1.5 min → 15–20 s, support staff costs –10–15%.

GitJob • HR-tech • Senior Product Manager

2021 — 2022

B2B platform that finds developers by their GitHub profiles and code instead of résumés. Goal: launch from zero and close the first B2B deals.

Cross-functional leadership of 6 people

- Wrote the PRD and designed the candidate ranking, then checked it with recruiters through custdev and A/B tests: 0 → 3M searchable candidates in 4 months.
- Shipped the MVP in 4 months and ran sales myself: first B2B deal in the first month after launch, then 8 more.

iReg • Legal-tech • Senior Product Manager

2020 — 2022

Copyright protection for authors in 100+ countries: e-signature certificate and secure storage of the work. Goal: grow the customer base and the average order value.

Cross-functional leadership of 12 people

- A/B-tested the pricing model, from one-off purchase to subscription and B2B: average order value 5×, customer base 2.5–3×.
- Rebuilt onboarding and content for each customer segment: purchases per customer 1 → 2.5.
- Doubled release cadence to 3 per quarter and took the product abroad via Microsoft, EY, and Startupbootcamp Global Pilots: first clients in the UK, Poland, Brazil, and China.

Pandao (Mail.ru) • E-commerce • Product Manager

2018 — 2020

Top-2 marketplace for goods from China across the CIS, app and web. Goal: grow the audience and checkout conversion.

Cross-functional leadership of ~40 people

- A/B-tested search ranking, cart, and checkout: checkout conversion +3 pp in the app and +1.8 pp on mobile web, average order value +60%.
- Grew acquisition, ASO, and retention: MAU 2M → 4.7M, web audience 1.5×, app audience 1.2×.

Education and certificates

Software engineering 2025
Ivanovo State Power Engineering University (IGEU)
